Kyocera
MONOCROME DESKTOP PRINTER FOR A4 FORMAT

**ECOSYS** stands for ECOlogy, ECONomy and SYStem-printing.

With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA’s long-life components cost you and the environment less.

**PRESCRIBE IIe**

With the KYOCERA page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (multiform forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

**The KM NetViewer**
The KM NetViewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunction units from any Windows® PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

**Status Monitor and Command Center**
The Status Monitor shows the current printers condition and gives direct access to the Command Center for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

**Consumables**

**TK-170 Toner-Kit**
Microfine toner for 7,200 pages A4 in accordance with ISO/IEC 19752

Capacity of starter toner is 2,300 pages A4 in accordance with ISO/IEC 19752
